WHY BUY AN ULTRA XR-PRO SERIES?

At Ultra Start, we realize that you, as a modern consumer, have an ever-growing number of choices for remote starters and vehicle security. Your vehicle is one of the most expensive things you own, therefore you should never have to compromise quality for affordable pricing.

With this in mind, Ultra Start has developed XR-PRO Remote Starters and Vehicle Security Systems. The XR-PRO offers a "modular" system that allows you to choose the system you need without spending money on part that you don't.

All Ultra Start XR-PRO has been designed by installation professionals with decades of experience. With our accumulated knowledge, we have developed products that streamline the installation process, work properly in virtually all vehicles and are very user-friendly.

No Competition: As with many other products, all remote starters are not created equally; some are engineered by people who have not experienced the extreme conditions of a North American winter. A number of manufacturers focus exclusively on price and take little consideration for quality, while others charge installation centers inflated pricing to cover large advertising budgets.

Simply Built Better: At Ultra Start, we have taken a very different approach. Our primary goal is to build a remote starter that makes no compromise when it comes to quality and features. Our systems are designed and engineered to last in the harshest climates in North America by the people who install and use remote starters as part of their daily lives.

User Friendly: User-Friendly: Many starters are designed with a variety of "bells and whistles" but fail when it comes to being USER-FRIENDLY. This is why we have designed our remote starters and alarms to be the MOST USER-FRIENDLY products available, so you can actually enjoy all of those cool features and options.
